SMALL IN SIZE, MORE IN FLEXIBILITY

Advantages

- The compact design with small space occupation
- Full enclosed protection and isolated work area completely isolate smoke and laser radiation.
- Single-phase power supply can ensure the normal operation of equipment, which makes it more convenient to connect, it could work in various places.

SELF-DEVELOPED CONTROL SYSTEM

Advantages

- Bodor Laser independent research and development system, perfect combination with BodorGenius laser head, brings to customers upgraded cutting technology and efficiency.
- BodorThinker
 - Integration of CAD and CAM can directly identify drawings and nest
 - Good adaptability, support G code(NC)、DXF、PLT、ENG and other file formats
 - The newly added batch processin function, in conjunction with the processing data-base, makes it more convenient in batch cutting.
 - The updated CAM logic and more open CAM function make it more convenient to change drawings, use more comprehensively, and easier to cut.

INTELLIGENT FUNCTIONS

Automatic lubrication system

- Automatic lubrication system provides timing and ration lubricating oil for equipment to ensure its normal and high speed operation, and owns functions of abnormal alarm and liquid level alarm. The system greatly enhances cutting accuracy and effectively extends service life of transmission mechanism.
-

Intelligent travel protection

- Automatically monitor operation range of crossbeam and cutting parts, keeping operation within machining range. Double guarantees of fixed limitation greatly improve equipment and personal safety, minimizing the using risks.

INTELLIGENT FUNCTIONS

A new generation of safety following module

- Laser head keeping distance with work piece in cutting process can reduce collision risks. It will stop cutting when colliding plate. The safety following module reduces accident rate and improves cutting performance.

INTELLIGENT FUNCTIONS

Intelligent alarm system

- The system will start full abnormal alarm and push it to the interface through control center when equipment is abnormal.
 - Finding equipment abnormal in advance and reducing hidden dangers can multiply improve the equipment troubleshooting efficiency.
-

Various intelligent sensor modules

- Various intelligent sensor modules to improve safety and device protection

ELECTRIC VERTICAL DOOR & PULL-OUT TABLE

Advantages

- Side door design; Easy, fast opening and closing with just one finger's press
- The new manual pull-out table design and optional electric table make operation experience fresh and satisfying. (Available only for i7)

STRETCHED ALUMINUM GANTRY(i5)

Advantages

- Integral pressure casting by steel mold makes it light, flexible and efficient
- The light weight and strong rigidity of aluminum alloy are suitable for high speed movement during processing, and the high flexibility is beneficial to high-speed cutting of various graphics.
- Light crossbeam offers high operation speed, improving efficiency and ensuring quality.

BODOR CLOUD

Advantages

- Daily equipment status management (processing data, report forms)
- Alarm and maintenance reminder
- Cloud transmission for processing programs
- Remote online service access with one key
- Real-time information of the latest cutting process
